**1. Restriction to one of the following inventions is required under 35**

**U.S.C. 121:**

- I. Claims 1-10, drawn to an apparatus for loading a mold cavity, classified in class 425, subclass 406 or 447.**
- II. Claims 11-20, drawn to a method of molding, classified in class 264, subclass 109+.**

**The inventions are distinct, each from the other because of the following reasons:**

**2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be performed using a materially different process such as a conveying belt and does not require the moveable table as claimed in the apparatus claims.**

**3.**

**4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.**

**5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.**
